Jim,

Is everything all set with the items Roger listed? Please let us know.

Thanks,

Stephen

Gentlemen:

The closer has been adjusted in rm . 245 ; door 247 has been adjusted again and the 2ft celing grid tee has been installed in the waiting room.

Roger/Steve,

Just ran into Jim this morning and the door to room N247 still will not close properly, the top of the door rubs against the plastic security sensor. And room N245, the back check needs to be adjusted.

Steve/Mark:

`s 1, 2, 5 were complete as of your writing. All doors are functioning properly and the silencers have been installed. I confirmed this with Jim today.

I am not sure what to do about the moisture coming through the VCT seams, I believe there is a duct chase below that portion of the floor which may be contributing to the moisture,

We will continue to try to ascertain the problem.

Roger,

Please see Mark's note along with the attached plan. Please let me know when these items are taken care of.

Thanks,

Stephen

Steve, see attached drawing:

1. Back check needs to be adjusted
2. Door won't close, rubbing on VCT
3. Moisture coming through VCT seems
4. Need to replace a 2ft. piece of ceiling grid
5. Missing door silencers
